

PEAK COMPLETIONS

**World Leader in
Horizontal Completion Technology**

Introducing the first of its kind ...

SNIPER PIN-POINT FRAC SLEEVE

providing improved access to
your tightest reservoirs

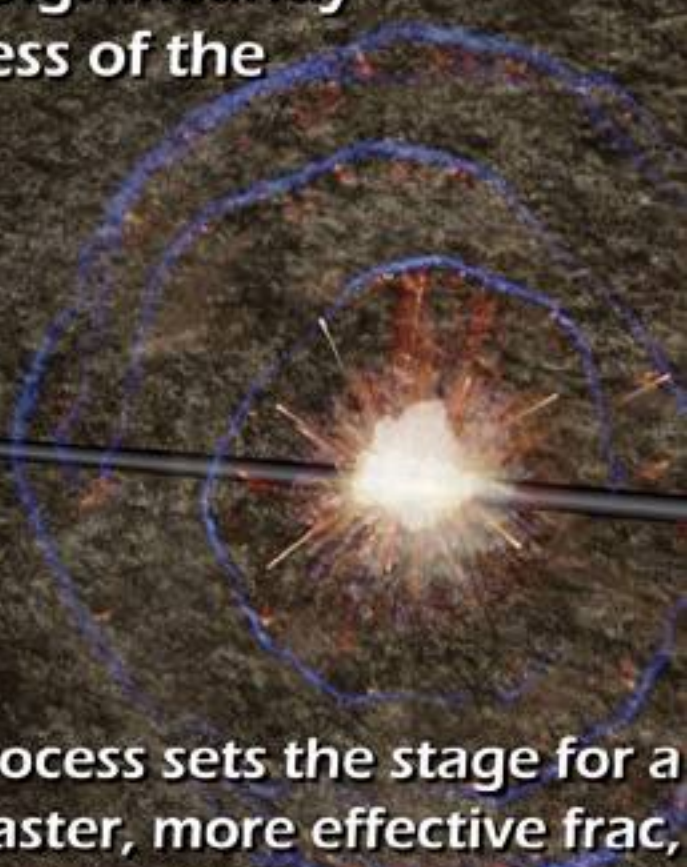

SAGE RIDER

SNIPER PIN-POINT FRAC SLEEVE

Peak Completions' new **Sniper Pin-Point Frac Sleeve** is the first of its kind. Once set, the system delivers a charge to open up high pressure reservoirs, significantly increasing the effectiveness of the frac process.

This process sets the stage for a faster, more effective frac, resulting in quicker access to pay and increased production.

SAGE RIDER

PEAK COMPLETIONS

- Proven Propellant Technology
- Mechanically Initiated
- Reduced formation break-down pressure
- Achieves rapid downhole pressure for short duration
- Proven Frac Sleeve Technology
- Precise placement of fracture initiation
- Positive indication of sleeve opening
- Sufficient loading over natural frac gradient to initiate bi-wing fractures
- Fracture lengths generated from 5-8 feet dep. on target rock properties
- Available upgrade to other Peak frac systems
- Also available for cased-hole applications

Peak Completion Technologies, established in 2003, specializes in custom completion systems which are wellbore specific. An industry leader in open-hole and multi-lateral completions, Peak offers a full range of **innovative completion equipment and techniques** for all oil and gas applications.

SageRider, Inc is an independent oil & gas service company focused on technical solutions designed to help you get the most from your asset. A collection of expertise from various sectors of our business, we think we are best positioned to understand your needs as our industry continues to change.

Our success is accomplished by:

- quality products and services;
- integrity of our efforts;
- desire to exceed our customers' expectations; and
- continual improvement of our processes, services and products.
